Ownership

Preston Hedges Trust is responsible for the production and maintenance of this document. It is issued by the Clerk, catherine.gautrey@prestonhedges.org to whom any change requests or queries should be directed.

General Data Protection Regulation Policy

This policy pertains to all the schools within the Preston Hedges Trust, including the Trust itself.

Trust/School Commitment:

The Trust/School is committed to the protection of all personal and sensitive data for which it holds responsibility as the Data Controller, the handling of such data in line with the data protection principles (see below) and the Data Protection Act (DPA).

Changes to data protection legislation (General Data Protection Regulations May 2018) shall be monitored and implemented in order to remain compliant with all requirements.

The legal bases for processing data are as follows –

(a) Consent: the member of staff/student/parent has given clear consent for the school to process their personal data for a specific purpose.

(b) Contract: the processing is necessary for the member of staff's employment contract or student placement contract.

(c) Legal obligation: the processing is necessary for the school to comply with the law (not including contractual obligations)

The requirements of this policy are mandatory for all staff employed by the school and any third party contracted to provide services within the school.

Article 6 Lawfulness of processing

Processing is necessary for the performance of a task carried out in the **public interest** or in the exercise of official authority vested in the controller;

Article 9 Processing of special categories of personal data

1. Processing of personal data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, or trade union membership, and the processing of genetic data, biometric data for the purpose of uniquely identifying a natural person, data concerning health or data concerning a natural person's sex life or sexual orientation shall be prohibited

2. Paragraph 1 shall not apply if one of the following applies:

1. (a) the data subject has given explicit consent to the processing of those personal data for one or more specified purposes, except where Union or Member State law provide that the prohibition referred to in paragraph 1 may not be lifted by the data subject;

The requirements of this policy are mandatory for all staff employed by us and any third party contracted to provide services.

If personal information meets the above criteria, then individuals who have personal information held by us will be made aware of the personal information and the criteria for holding the information in the 'Information Audit' document, located on our website.

Roles:

The nominated member of staff responsible for data protection is the Principal of the school and the CEO of the Trust. Principal may delegate data controller duties as necessary.

The Data Controller is the school/Trust who (either alone or jointly or in common with other persons) determines the purposes for which and the manner in which any personal data are, or are to be processed

The Data Protection Officer (DPO) is Ruth Hawker, Plumsun Ltd. Contact details can be found on the website: www.plumsun.com

The DPO monitors internal compliance, and informs and advises the school about their data protection obligations and acts as a contact point for data subjects and the supervisory authority.

The DPO is independent, an expert in data protection, adequately resourced, and reports to the highest management level.

All staff will treat all student information in a confidential manner and follow the guidelines as set out in this document.

Any Data Processors, processing data on behalf of the school (i.e. external organisations) will confirm that they are achieving their obligations under the GDPR Regulations, and are registered with the ICO.

Roles under GDPR can be found on the ICO Website.

Training:

The school is also committed to ensuring that staff are aware of data protection policies and legal requirements.

Notification:

Data processing activities and persons responsible will be registered with the Information Commissioner's Office (ICO) as required by the ICO. Details are available from the ICO: <https://ico.org.uk/about-the-ico/what-we-do/register-of-data-controllers/>

Changes to the type of data processing activities being undertaken shall be notified to the ICO and details amended in the register.

Breaches of personal or sensitive data shall be notified to the individual(s) concerned and the ICO as specified in the GDPR Regulations.

Personal and Sensitive Data:

All data within the school's control shall be identified as personal, sensitive or both to ensure that it is handled in compliance with legal requirements and access to it does not breach the rights of the individuals to whom it relates.

The definitions of personal and sensitive data shall be those published by the ICO for guidance.

Principles:

Under the GDPR, the data protection principles set out the main responsibilities for organisations.

Article 5 of the GDPR requires that personal data shall be:

- a) processed lawfully, fairly and in a transparent manner in relation to individuals;
- b) collected for specified, explicit and legitimate purposes and not further processed in a manner that is incompatible with those purposes; further processing for archiving purposes in the public interest, scientific or historical research purposes or statistical purposes shall not be considered to be incompatible with the initial purposes;

- c) adequate, relevant and limited to what is necessary in relation to the purposes for which they are processed;
- d) accurate and, where necessary, kept up to date; every reasonable step must be taken to ensure that personal data that are inaccurate, having regard to the purposes for which they are processed, are erased or rectified without delay;
- e) kept in a form which permits identification of data subjects for no longer than is necessary for the purposes for which the personal data are processed; personal data may be stored for longer periods insofar as the personal data will be processed solely for archiving purposes in the public interest, scientific or historical research purposes or statistical purposes subject to implementation of the appropriate technical and organisational measures required by the GDPR in order to safeguard the rights and freedoms of individuals; and
- f) processed in a manner that ensures appropriate security of the personal data, including protection against unauthorised or unlawful processing and against accidental loss, destruction or damage, using appropriate technical or organisational measures.” Article 5(2) requires that:

“the controller shall be responsible for, and be able to demonstrate, compliance with the principles.”

Notifications shall be in accordance with ICO guidance and, where relevant, be written in a form understandable by those defined as ‘Children’ under the legislation.

The need for consent:

We will ask for consent to hold and process personal information if there is no lawful basis for doing so (see article 6 and Article 9 above).

Data Breaches:

A personal data breach means a breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, personal data. This includes breaches that are the result of both accidental and deliberate causes. It also means that a breach is more than just about losing personal data.

All data breaches must be immediately reported to the nominated Data Controller representative (CEO/Principal).

The Data Protection Controller will assess whether the breach needs to be reported to the ICO and/or individuals concerned.

The Data Controller's nominated representative will make any necessary reports.

Immediate Action will be taken to review how the breach has occurred, and to make any necessary changes to procedures to ensure that the same problems do not arise in the future.

The Data Protection Officer will provide a monitoring role and be a contact point for the supervisory authority as necessary.

Protection Impact Statements:

The school will evidence the thought and decision-making process about data protection when designing any processes in school which involve personal data.

A Data Protection Impact Statement (DPIA) is needed when:

- New Technology is being deployed
- A profiling operation is likely to significantly affect individuals
- There is processing on a large scale of the special categories of data ('special categories' as specified in GDPR guidance)

Individuals Rights:

Individuals have the right to:

- Be informed about what data is being held (Information Audit Document published on the school website).
- Be informed about how and why the data is being processed (Information Audit Document published on the school website).
- The right to access any data that is being held (see Subject Access Requests below).
- The right to request that any data is erased (see Subject Access Requests below).
- The right to restrict processing.
- The right to data portability (that the individual can transport the data held about them to another service) if the data is held by automatic means.
- The right to object to the way data is being held or processed.
- The right not to be subject to automated decision-making.

The individual can write to the Principal/CEO regarding requests for data to be erased, to restrict processing, to data portability, to not be subject to automated decision-making, or the right to object to the way data is being held or processed.

Sharing of Information with Third Parties:

There may be circumstances where the school is required either by law or in the best interests of students or staff to pass information onto external authorities, for example local authorities, Ofsted, or the department of health. These authorities have to adhere to data protection law and have their own policies relating to the protection of any data that they receive or collect.

Personal data about children, will not be disclosed to third parties without the consent of the child (at an age who can act for themselves, specified under GDPR guidance) the child's parent or carer, unless it is obliged by law or in the best interest of the child.

Examples of data that may be disclosed to third parties without the need for consent:

- Other schools: If a pupil transfers from one school to another school, their academic records and other data that relates to their health and welfare will be forwarded onto the new school.
- Examination authorities: This may be for registration purposes, to allow the pupils at the school to sit examinations set by external exam bodies.
- Health authorities:(under health legislation), the school may pass on information regarding the health of children in the school to monitor and avoid the spread of contagious diseases in the interest of public health.
- Police and courts: if a situation arises where a criminal investigation is being carried out we may have to forward information on to the police to aid their investigation.
- Social workers and support agencies: In order to protect or maintain the welfare of pupils, and in cases of child abuse, it may be necessary to pass personal data on to social workers or support agencies.
- Department for Education and Ofsted to help the government monitor and audit school performance and enforce laws relating to education

The intention to share data relating to individuals to an organisation outside of the school shall be clearly defined within notifications and details of the basis for sharing given. These details are provided in the 'Information Audit Document' located on the school website. Data will be shared with external parties in circumstances where it is a legal requirement to provide such information, or where it is for the purpose of pupil provision, such as school meals and on-line curriculum work. ^[1]_[SEP]

Any proposed change to the processing of individual's data shall be notified to them (see the 'Information Audit Document' above). Under no circumstances will the school disclose information or data:

- that would cause serious harm to the child or anyone else's physical or mental health or condition

- indicating that the child is or has been subject to child abuse or may be at risk of it, where the disclosure **would not** be in the best interests of the child
- that would allow another person to be identified or identifies another person as the source, unless the person is an employee of the school or a local authority or has given consent, or it is reasonable in the circumstances to disclose the information without consent. The exemption from disclosure does not apply if the information can be edited so that the person's name or identifying details are removed.

Data Access Requests (Subject Access Requests):

All individuals whose data is held by the school, has a legal right to request access to such data or information. A child may make a subject access request for themselves, specified under GDPR guidance. The school shall respond to such requests within one month.

They should be made in writing to the Principal, who may delegate the request (as specified in their role above).

In line with our safeguarding and GDPR obligations, some personal information may be redacted for reasons such as:

- Information that might cause serious harm to the physical or mental health of the pupil or another person;
- Information containing personal information about more than one individual.

The Data Protection Officer (specified in 'Roles' above) will independently advise any requests as necessary. They will act as a contact point for data subjects and the supervisory authority.

No charge will be applied to process the request. ^[1]_[5EP]

There is a right to appeal to the ICO upon dispute of a decision.

Right to be Forgotten:

Where any personal data is no longer required for its original purpose, an individual can demand that the processing is stopped and all their personal data is erased by the school including any data held by contracted processors.

Photographs and Video:

Images of staff and pupils may be captured at appropriate times and as part of educational activities for use in school only. Unless prior consent from parents/pupils/staff has been given, the school shall not utilise such images for publication or communication to external sources. At events, for example, such as Sports Days and assemblies, it is expected that parents will be able to take photos of their own child. School will always remind parents, prior to the event, not to share these images online.

Location of Information and Data:

Hard copy data, records, and personal information are stored out of sight and in a locked cupboard. The only exception to this is medical information, attendance registers and signing in books (which must be immediately accessible and used in the case of an emergency). Sensitive or personal information and data should not be removed from the school site, however the school acknowledges that some staff may need to transport data between the school and their home in order to access it for work in the evenings and at weekends. This may also apply in cases where staff have offsite meetings, or are on school visits with pupils. Risks of identified breaches from existing processes have been considered and have been recorded on an Impact Assessment Form.

The following guidelines are in place for staff in order to reduce the risk of personal data being compromised:

- Paper copies of data or personal information should not be taken off the school site, unless the Data Controller has provided permission to do so (such as the need for emergency information during educational visits or the need to have personnel files available for the Trust audit). If there is no other way to avoid taking a paper copy of data off the school site, the information should not be on view in public places, or left unattended under any circumstances. If, as in the event of files being needed for auditing purposes, information is

held off site for a period of time, the Data Controller must have provided permission, and these files must be held in a locked cabinet by the Central Team. As soon as the files have been audited, they must be returned to their home site. They must be audited in a paper copy state to avoid the risk of data breach.

- Unwanted paper copies of data, sensitive information or pupil files should be shredded. This also applies to handwritten notes if the notes reference any other staff member or pupil by name.
- Care must be taken to ensure that printouts of any personal or sensitive information are not left in printer trays or photocopiers.
- If information is being viewed on a PC, staff must ensure that the window and documents are properly shut down before leaving the computer unattended. Sensitive information should not be viewed on public computers.
- If it is necessary to transport data away from the school, it should be downloaded onto a password protected computer. Teacher's laptops all have bitlocker encryption with password plus a log on password, so data stored on teacher laptops are secure for data holding. The data should not be transferred from computers or USB onto any public computers. Work should be edited from the USB/encrypted laptop, and saved onto the USB or encrypted laptop only.

These guidelines are clearly communicated to all school staff, and any person who is found to be intentionally breaching this conduct will be disciplined in line with the seriousness of their misconduct

Data Security:

In order to assure the protection of all data being processed and inform decisions on processing activities, we shall undertake an assessment of the associated risks of proposed processing and equally the impact on an individual's privacy in holding data related to them. Risk and impact assessments shall be conducted in accordance with guidance given by the ICO and in compliance with the Data Protection Regulations (GDPR).

Security of data shall be achieved through the implementation of proportionate physical and technical measures. Nominated staff shall be responsible for the effectiveness of the controls implemented and

reporting of their performance. The security arrangements of any organisation with which data is shared shall also be considered and where required these organisations shall provide evidence of the competence in the security of shared data.

Data Disposal:

The school recognises that the secure disposal of redundant data is an integral element to compliance with legal requirements and an area of increased risk. All data held in any form of media (paper, tape, electronic) shall only be passed to a disposal partner with demonstrable competence in providing secure disposal services. All data shall be destroyed or eradicated to agreed levels meeting recognised national standards, with confirmation at completion of the disposal process. Disposal of IT assets holding data shall be in compliance with ICO guidance.
